## EDUCATION

### University of Illinois

Bachelor of Science in Computer Science

Chicago, IL

May 2025

## TECHNICAL SKILLS

**Languages:** Dart, C/C++, Java, Python, HTML, CSS, JavaScript, Typescript, Rust, F#.

**Frameworks:** Flutter, React, Nodr.js, PostgreSQL, Java FX, JUnit, TensorFlow, Jira.

**Developer Tools:** Android Studio, Git, GitHub, VS Code, Visual Studio.

## RELEVANT WORK EXPERIENCE

### Software Development Intern

Ingenio Care Inc.

January, 2025 – Present

Lombard, IL

- Developed application components for the Ingenio Care Network using React, Node.js, Sequelize, and PostgreSQL.
- Tested and debugged software, reducing defects by 30%, while ensuring performance and quality standards.
- Collaborated with the team to design and implement three new features, enhancing user experience and functionality.
- Resolved over 15 technical challenges, delivering solutions in a fast-paced startup environment within tight deadlines.
- Contributed to operational initiatives outside primary responsibilities, driving a 10% improvement in team productivity.

### Computer Science Tutor

University of Illinois

January 2023 – December 2024

Chicago, IL

- Delivered personalized feedback and assessments, leading to a 20% improvement in students' comprehension and academic performance within three months.
- Conducted one-on-one coding sessions, employing real-world examples and debugging exercises, resulting in a 40% improvement in assignment grades and confidence.
- Mentored students in building web applications and solving advanced algorithmic problems, fostering analytical thinking and robust coding practices.
- Tutored students in software design principles, data structures and algorithms (DSA), and languages including Java, Python, and C++, ensuring mastery of fundamentals.

## PROJECT EXPERIENCE

### Evently | ReactJS, Node.js, Python, Machine Learning, Agile

August 2024

- Developed a React-based web application, **Evently**, allowing users to discover and RSVP to events with personalized recommendations, enhancing user experience.
- Engineered a web scraping pipeline using Node.js and Python to aggregate and standardize real-time event data from multiple sources.
- Implemented a machine learning model to analyze user RSVP history, increasing user engagement by 40% through event recommendations.
- Designed and deployed a secure QR code check-in system, ensuring seamless, fraud-resistant event participation for attendees.

### Smart Grocery | Flutter, Dart, Git, Jira

March 2024

- Built a cross-platform app for iOS and Android with Flutter, implementing a responsive UI and seamless user navigation.
- Designed a SQL database with secure authentication via hashed passwords to manage user profiles and retrieve 1000+ recipes.
- Led the integration process and ensured timely task completion by employing Git for version control and Jira for Agile task tracking.
- Developed a recommendation system using a machine-learning algorithm, enhancing user engagement by 35% and recipe conversions by 25%.
